# Recovery Mode of C6 with Android 13

1. Press the volume button on the left side for about 2 seconds, then press the power button on the right side at the same time for about 3 seconds, after that release the power button and press volume button only, for about 6 seconds to enter the following UI.

2. Press the volume button on the left side to move cursor to select 'Recovery Mode', and press button above volume button on the left side to confirm;

3. In the new UI of 'No Command', please press power button first, then press volume button at the same time quickly. After that please release these two buttons to enter this new UI. Please do not press power button too long, otherwise device would be forced to restart automatically;

4. Press volume button on the left side to move the cursor to select 'Wipe data/factory reset', then press power button to confirm;

5. After factory reset process, please press volume button to select 'Power off' and press 'Power button' to confirm, to exit this mode.
